VOLUME 34: No. 12

Authorized as Second Class Mail, Post Office Department, Ottawa
ACME, ALBERTA, THURSDAY, APRIL 28th, 1955 \$1.50 a Year; 5c a Copy

Mr. and Mrs. Len Poxon returned home after spending a few weeks at the west coast. They motored home accompanied by Mr. and Mrs. Fred Poxon of Drumheller.

The Ladies Auxiliary Canadian Legion 161 held their regular meeting on Monday, April 25th. Mrs. Harry Hunt was elected delegate to attend the annual convention in Calgary June 12th.

We saw Dave Gieck taking out a new tractor. You were in too much of a hurry, Dave.

LAC and Mrs. Fraser and baby spent the weekend at the home of Mr. and Mrs. C. Graham. Mrs. Graham returned home after spending two weeks in Calgary.

Mr. Jock Ried of Vancouver is visiting at the home of his son and daughter-in-law, Mr. and Mrs. John Ried. We understand he is here to help with the spring weather. The weather is not giving much co-operation.

A Search for Talent evening was held last Friday evening by the Students Union in the School Auditorium. Bobby Ohlhauser was the star of the evening, winning the grand prize with his interpretation of Yogi Borgen. The hall was packed to capacity with only standing room left.

Mr. and Mrs. E. Wiffen and Mrs. Bill Poole were recent visitors to the Wayne Home and report Mrs. E. Smith and Mrs. M. Isaac are doing very well and enjoying one another's company. Mrs. Smith is so well and active despite her years she enjoys doing things and helping others.

Mr. and Mrs. David Flaws and baby of Swift Current spent the weekend at the home of Jim Flaws. David attended the funeral of the late Jack Parkens.

JACK PARKENS

The death of Jack Parkens came as a shock to his many friends. He was found under a car in the garage where he was employed by the Dowell Oil Co. at Swift Current.

He leaves to mourn his loss, his wife, Gladys (nee Mortimer); daughter, Shirley of Edmonton; one sister and two brothers.

Funeral services were held at Gooder Bros. Funeral Home on Sat., April 23rd with interment was in Queen's Park Cemetery.

Sale of Home Cooking will be held May 7th at 3 p.m. in the Legion Hall by the Junior Ladies' Aid.

Mrs. Kenny Sr. of Stettler is visiting at the home of her son and daughter-in-law, Mr. and Mrs. Frank Kenny.

Mrs. E. Wiffen is spending a few days in Calgary at the home of her daughter and son-in-law, Mr. and Mrs. E. Maskie.

Dorn Wilson, Gordon Hunt, Rev. Roberts and E. Wiffen motored to Hanna on Wed. evening to attend a district meeting of the Drumheller Anglican Deanery.

The Canadian Legion Carbon Branch 161 wish to thank all who contributed to the recent Polio Drive. The sum of \$479.46 was raised, which was a great increase over last year's total. Many thanks to all from the President and fellow comrades of Carbon Branch 161.

D. Wilson, Treas.

Mrs. Louisa Hay returned on Wed. following her recent illness in the Calgary General hospital.

W. Braisher is out of the hospital and staying at the home of relatives in Calgary. Mrs. Braisher returned home Sunday.

Mr. and Mrs. Harry Dodky were Carbon visitors this week. We understand they are coming back here to reside after several years in Calgary where Mr. Dodky was employed by Burns and Co. Ltd.

FOR SALE—19.7 acres adjoining the Village of Carbon. House and Barn. Price \$2000 or will trade for cattle.

Chevrolet *paves* the way

Takes the jolt out of riding

New suspension systems, front and rear, are engineered to give the smoothest ride you've ever known.

Flattens the hills—hugs the road...

Brilliant new high compression, valve-in-head V8 or 6-cylinder engines combine with a new low weight-to-power ratio that means breathtaking response.

Takes the lean out of tight corners

The new low centre of gravity, wider spaced springs and tubeless tires give an amazing new grip of the road.

Takes the dip out of stopping

No more dipping and diving. The Chevrolet hood stays up level even during sudden stops—letting you maintain sure control with ease.

... And Looks So Lovely, Too!

It's not just the exciting ride that makes Chevrolet dramatically new. For when Chevrolet decided to combine the agility and safety of a sports car with the room and comfort of a family car, the designers were free to set the pace for things to come in functional, dashing styling. The result is a new kind of family car, as you will discover for yourself when you take a "Pleasure Drive" at your local dealer's. Why not call him today?

A GENERAL MOTORS VALUE

GARDEN NOTES—

No matter what the location there are flowers that grow

No matter what sort of a location there are some flowers which will grow in any garden. For rough spots or slopes one can make a rock garden and grow the special little plants that are listed in any seed catalogue. As a rule these are tiny things, which like shallow and dryish soils. Many of these rock garden plants originally came from mountain slopes.

For dark shady corners there are things like begonias, lily of the valley and such that will thrive there and nowhere else. At the other end of the scale are portulaca, poppies, alyssum and so on that delight in the hottest sunshine, will stand drought and are not particular at all whether the soil is rich. There are certain things that must be in a dry location and others that don't mind getting their feet wet. There are some that are exceptionally hardy and bloom after the frost. And, there is, of course, a wide range in color and height and time of blooming.

How To Hold FALSE TEETH More Firmly in Place

Do your false teeth annoy and embarrass by slipping, dropping or wobbling when you eat, laugh or talk? Just sprinkle a little FASTEETH on your plates. This alkaline (non-acid) powder holds false teeth more firmly and more comfortably. No gummy, gooey, pasty taste or feeling. Does not sour. Checks "plate odor" (denture breath). Get FASTEETH today at any drug counter.

Home Workshop

The arms and back legs of this chair are cut in one piece from a board 11½ inches wide. The front legs are from the same piece. Your neighborhood woodworkers will saw these pieces while you wait. The assembling is a simple jog of gluing and driving screws. The result is a sturdy chair that will give years of service. The back and seat cushions rest on upholstery webbing and the pattern gives large sketches showing exactly how the webbing is stretched and tacked, as well as how to make the cushions with corded seams. Foam rubber covered with fabric to match other furniture may be used. See sketch for pattern numbers and enclose 35c for each pattern ordered.

The unusual features of these figures are the natural coloring and life-like action poses. No special skill is needed for painting. The areas for the different colors are traced and then filled in as indicated on the pattern. The gradation of tone gives a most realistic effect. Use ordinary oil colors or poster colors. The latter are much cheaper but the work must be waterproofed with a coat of shellac. Mixing formulas and painting routine are given on the pattern which is 35c. Also this pattern is included in the packet of patterns for making lawn and garden figures. The price of the packet is \$1.50 postpaid. Address order to—

Austria and Switzerland are famed for their winter skiing facilities. 3137

Any seed catalogue will list all these preferences and differences and with such information one can go ahead and fit plants to any location and also create a garden that will be interesting and full of bloom from June until October.

Vegetables for small space

Every family, if at all possible, should have a small vegetable garden, even if there is only room for a few feet of lettuce, onions and radish, not a great deal of room will be necessary. To make it go further, there are various ways of growing two crops, or practically so, on the same piece of land. Of course in this intensive sort of vegetable gardening, extra fertilizer is essential and the soil must be well worked and rich.

In double cropping, we alternate rows of an early kind with a later one, for instance, radish and carrots, or lettuce and beans, or peas and potatoes. We also have less space than normal between the rows, if necessary no more than 12 or 15 inches. The early stuff, of course, comes on quickly and is used up before the later maturing vegetables require full room.

Another practice is to follow the harvesting of the first vegetables like the peas, lettuce, spinach, radish, early onions, etc., with another sowing of the same or something else that will be ready say in August or September. Then there are certain crops like squash, pumpkins, that we can plant in the outside rows and we can have staked tomatoes along the end of any vegetable row and cucumbers along the fence.

For the new home

For the new home, while we are waiting for trees and shrubbery to grow, we can use some extra tall annuals to give us the same effect.

For this purpose in the annual line we can use cosmos, giant zinnias, marigolds, stocks or snapdragons, or still larger dahlias, larkspur, helianthus, or others. Heights are always noted in the catalogue.

Some of these are busy as well as tall and in a matter of weeks they will make a beautiful background screen. Of annual vines there is a wide range from climbing nasturtiums and sweet peas to scarlet runner beans, annual hops, or morning glories. These will trail over a fence or screen a verandah.

This little pig had final fling

WINNIPEG. — This little pig went to market . . . But this little pig decided to have one last fling.

With this in mind, Percy the Porker abandoned his market-bound brothers and sisters and escaped from his owner's truck to scamper about downtown Winnipeg streets for 20 hilarious minutes.

Streetcars clanged, horns blared and hundreds of pedestrians laughed as Percy lead a weaving unscheduled parade which included policemen and volunteers.

Finally he was caught and his captors told the owner about Percy.

The squealers!

Lac la Ronge wants to be a village

REGINA — The Saskatchewan department of Municipal Affairs is processing a request by rate-payers for the incorporation of La Ronge as a village.

J. W. Churchman, deputy minister of Natural Resources, said a petition had been received through the department's northern administrator and has been turned over to the municipal affairs branch.

Mr. Churchman said this is the second such sub-division in Saskatchewan's northern administration area to ask for incorporation.

The first was Creighton, which now is the largest village in Saskatchewan — both in area and population.

With the exception of the village of Creighton, which was incorporated in 1952, all settlements in Saskatchewan's northern administration district are administered by the northern administrator.

Mr. Churchman said the department encourages settlements to incorporate and administer their own municipal affairs, as soon as they feel able to do so.

La Ronge, 180 miles north of Prince Albert, is a growing, thriving resort settlement of approximately 500 population. It was first surveyed in 1947, and now has approximately 362.9 acres.

APPRECIATION

WINNIPEG. — Passengers on a Winnipeg bus admired the valentine and chocolate heart stuck in front of the driver. He explained three school-teachers presented it with the inscription: "To a nice driver." The driver said: "It's not often you get a thank you on this job."

Flying dangers during spring

During the spring, flies and other insects spend a lot of their time hunting ways of getting into houses where they can raise their families of thousands. Houseflies bring in disease germs from garbage and street filth; this, they deposit on exposed food, table linen and on the faces of baby and the rest of the family.

The stinging species can make life miserable for adults and children. To protect the home from pests that are dangerous as well as a nuisance, windows and doors should be screened before the insect hordes come to life again.

Casablanca is one of the fastest growing cities in North Africa.

Best foot straight forward

The way we walk has a lot to do with our becoming tired and fatigued. The person who walks with his feet pointed "ten minutes to two," will tire much more quickly and actually take more steps than the walker who steps out with feet pointed straight ahead. The latter method not only gives better balance but also puts less strain on the bones and muscles of the foot.

DO YOUR BIT

If any little word of mine
May make a life the brighter,
If any little song of mine
May make a heart the lighter—
Then help me speak the little word
And make my bit of singing
And drop it in some lonely vale
To set the echoes ringing.

Butterscotch-Pecan Cookies

Grease cookie sheets. Preheat oven to 350° (moderate). Mix and sift twice 2½ c. once-sifted pastry flour (or 2½ c. once-sifted all-purpose flour), 2 tsps. Magic Baking Powder and ½ tsp. salt. Cream ¾ c. butter or margarine and gradually blend in 1½ c. lightly-packed brown sugar; add 2 well-beaten eggs part at a time, beating well after each addition; mix in ¾ tsp. vanilla and ¾ c. chopped pecans. Add flour mixture to creamed mixture part at a time, combining thoroughly after each addition. Drop dough by spoonfuls, well apart, on prepared cookie sheets; flatten with the floured tines of a fork. Bake in pre-heated oven 10 to 12 minutes. Remove from pan immediately. Yield—6 dozen cookies.

SCIENCE MAY FIND NEW "SIGHT" FOR BLIND

Sightless savant seeks to develop electronic aid

By JAMES F. HAUGHTON
(CPC Columnist)

HAVERFORD, Pa. — Science may provide new "sight" for the blind, if the research of a sightless physics professor at Haverford college in Haverford, Pa., is successful.

Prof. Thomas A. Benham, blind since he was two years old, is midway in a three-year study grant sponsored by the U.S. Veterans administration to develop an electronic aid for the blind. He is working in co-operation with engineers of an instrument company of nearby Philadelphia.

The answer for the blind may be found in a small box which weighs about four pounds, has a carrying handle and could be mistaken for a portable radio. If intensive research proves successful, it may open up an entirely new world for the blind, especially those not fortunate to own a Seeing Eye dog.

The electronic guide—its official name is guidance device sensory aid—has a glow lamp that sends out a pulse of light which strikes an object and bounces back through the electronic eye. The signal from the sensory aid is amplified and activates a poking device of button in the hand which indicates an object is in view.

The guide actually has three ranges of distance: closer than three feet, three feet to seven feet, and seven to 10 feet. Each distance activates a button which hits a finger.

Benham was asked what would happen if all buttons hit the user's hand at the same time. "Then things are getting complicated so watch out," the 38-year-old professor noted humorously.

In developing the aid, Benham and his associates must isolate two factors. A curb finder and an obstacle detector.

"We have the obstacle finder pretty much under control and have a laboratory model. The curb finder is well on its way," Benham said. Because of the two factors the researchers must attempt to avoid duplication and to consider the size of the aid and the number of buttons.

Benham said it is hoped to develop the curb finder to a point where it will operate a button to go with the three for the obstacle finder. Each of the buttons would thus strike a finger on the holder's hand.

Neither Professor Benham nor his associates can offer a definite answer to the eventual cost of the unit if it is placed on the market. Benham estimates 10,000 could be manufactured to sell for around \$200 each.

Work on the project had its beginning back in 1943. With the professor's aid, a model larger than the present one was finally developed in 1944.

Following much research, a

Strictly Fresh

Some folks sure get into a rut. Fellow in Los Angeles, Calif., told the judge that he wrote bad cheques to cover other bad checks which he had written while free on bail on a previous bad-check charge.

Stripteaser in Buffalo, N.Y., had her costume stolen by a night club patron "for revenge" because she wouldn't have a drink with him. Pretty scant satisfaction, we'd say.

Friend of ours who likes to read says that the best thing he's seen on TV recently is an "out-of-order" tab.

Octopus recently made history by being shipped coast-to-coast by air. Stewardesses say that high-

flying creatures who apparently have eight arms have been aboard for years—but that they're usually called "woives."

When summer arrives, flourishing racetracks will produce a crop of blooming idiots.

A blind man tests a guidance device sensory aid in the busy area which is the heart of bustling Philadelphia.

—Central Press Canadian.

smaller model was created and from it 25 guides were made. Benham then began to field work among 2,000 blind persons in the Philadelphia area before selecting 67 persons to test the model.

The group ranged in age from nine to 78 and included 46 males and 21 females. They received two weeks of training in use of the aid and then used it two weeks. Another small group used it for a longer period. None had vision to travel unaided or to detect curbs.

However, after the initial study was completed, the professor felt there was much more to be accomplished. He made several visits to Washington to urge continuance of the work. Finally in early 1953 Haverford college received a \$30,000 grant to resume the work

under Benham's direction. Benham points out that the sensory aid won't replace the Seeing Eye dogs. "A dog can think, see, analyze and remember. This can't. A person who can use a Seeing Eye dog won't use this," he said.

The blind professor who lives on the Haverford campus, is married and the father of three children who are quite at home in his laboratory. A native of Hartford, Conn., he attended the Pittsburgh and Overbrook (Philadelphia) Schools for the Blind.

He was graduated from Haverford in 1938 and did engineering research work in industry before returning here in 1942 as a faculty member. Benham is now an assistant professor of physics.

Old ranching days were best declares retired ranch cook

BROOKS, Alta. — Gorgonzola cheese is still a favorite with David (Scotty) Porteous, retired ranch cook, who can remember when his precious cheese supply was once totally consumed.

Two paleontologists, looking for dinosaur skeletons in southern Alberta, were visitors at the ranch where Scotty was head cook. After eating all of Scotty's cheese supply, one guest said: "That was a rare treat, Scotty."

The cook replied: "Ye don't rightly know just how rare."

Porteous was cook for 16 years at the once-famous Rocking P cattle ranch, 20 miles north of here. Scotty says that one of the ranch co-owners, George Emerson, was one of the greatest cattlemen of the "Old West."

Roaming cattle

Scotty says he still prefers the old ranching method when cattle were allowed to roam the prairie. He says Emerson was ridiculed when he first brought thin purebred cattle from Manitoba to the ranch, 130 miles east of Calgary.

However, other ranchers soon realized Emerson was right about

the hardness of the purebreds, and some even bought from the ranch owner for their own herds.

He likes to recall the old round-ups, when each cowboy had a string of eight to 10 horses. These were looked after by a "jangler," or camp helper. Scotty says the name "jangler" probably came from the bells worn by the horses to aid the helper in keeping the steeds together.

One of his prized possessions is a brand book dated 1888, given to him by Emerson before the latter's death.

:: GEMS OF THOUGHT ::

SPEAKING AND LANGUAGE

A printed speech is like a dried flower: the substance, indeed, is there, but the color is faded and the perfume gone.—Paul Lorain.

Human language can repeat only an infinitesimal part of what exists.—Mary Baker Eddy.

While the right to talk may be the beginning of freedom, the necessity of listening is what makes the right important. — Walter Lippmann.

If you don't say anything, you won't be called on to repeat it. —Calvin Coolidge.

The soul of good expression is an unexpectedness, which, still, keeps to the mark of meaning, and does not betray truth. —John Galsworthy.

Synthetic substance dextran effective in emergencies

TORONTO.—Ontario Provincial Secretary W. M. Nickle has said that research work at Queen's University has provided further confirmation that the synthetic substance dextran can be an effective emergency substitute for blood plasma.

Research workers at Queen's have been working for some time on the bodily reactions to dextran—how it is absorbed and whether it is harmful in any way.

Mr. Nickle said the Queen's scientists have reported that they have found no ill effects in the administering of dextran.

Mr. Nickle made the statement in the Ontario legislature during consideration of estimates of his department. He suggested that a back-log of dextran be established in the province for civil defence purposes.

Expands plasma

Dextran is a product manufactured from glucose and acts as a "plasma volume expander" when given to a person in shock. It re-

turns the volume of blood to normal and enables the body to continue normal functions.

Dextran is not a replacement for blood transfusions and supplies neither blood protein nor blood cells. It is used strictly as an emergency measure in shock cases and is often given in conjunction with blood if the patient has lost a lot of blood.

Mr. Nickle said because dextran could be readily available in either powder or liquid form and stored for several years without deterioration, the development constitutes a great advance in the measures the Western world is taking to guard against effects of nuclear weapons.

Superior to plasma

Blood plasma, a component of blood, is not readily kept on hand and carries the risk of infection. Dextran is superior because of its storing qualities and the fact that it does not transmit infection.

Mr. Nickle (PC—Kingston) said that the research at Queen's University has been headed by Dr. G. Howard Ettinger, dean of medicine, assisted by Robert Semple of the department of physiology.

Dextran was originated in Sweden in 1946 and has been available in Canada for the last five years. It was adopted by the United States army as a replacement for plasma in 1953 and was used extensively in Korea.

Need help cut toll child death

REGINA.—J. A. Christie, chairman of the Saskatchewan Highway Traffic Board, has called for greater co-operation by parents, drivers and children to cut down the toll of children killed and injured on the province's streets and highways.

Mr. Christie pointed out that during 1954, over eight percent of the year's fatalities were children under 15 years of age, and 9.4 percent of those injured were in the same category.

Mr. Christie suggested the following rules for motorists:

1. Always expect the unexpected where children are concerned, remembering that children are unpredictable and that the motorist must think for them in traffic.
2. Give young bike riders every break.
3. Drive with extreme caution near schools and playgrounds and in residential areas—in fact, near any place where children may be expected to gather.

Parents, as pedestrians, should always set a good example by crossing streets at intersections, waiting for the signal, and looking both way for turning traffic before crossing.

Mr. Christie added that parents should see that their children always take the safest route between school and home; use roller skates, tricycles, wagons and scooters on the sidewalks only; and when walking where there are no sidewalks, to stay on the left side of the road facing traffic.

Spring will be here shortly, and children will be anxious to play outdoors once again, Mr. Christie said. If all will co-operate, he added, the toll of life and injury among young children can be greatly reduced.

Remember—Only you can PREVENT FOREST FIRES

The 4,000-year-old palace of King Minos was as large as London's Buckingham palace. It was located at Cnossus, Crete.

Reclining Chair Gives Comfort to Homemaker

BY EDNA MILES

THE relieving of tension is a problem handled in various ways by people caught up in the complexities of modern living. There are the outdoor sports types, the massage enthusiasts, the lovers of classical music, the believers in the catnap.

Whatever the method, the fact remains that more and more people recognize tension as a factor in their everyday lives, and are trying to do something about it. Generally, the homemaker is supposed to have the softest snap.

She is, after all, her own boss. She makes her own hours. Actually, she's at the beck and call of everyone in the family, from the baby on up. It's true, too; that she hasn't any hours. They stretch from early morning to late evening.

That's why it's essential for the housewife to relax a bit every day. A reclining chair will turn the trick because it eases tension at five points of strain: Shoulders, back, hips, knees and ankles. Then, too, it relaxes all muscles of the body.

Chairs come in handsome fabrics, too, and simulated leather (plastic) that wipes clean with a damp cloth.

This homemaker is really sitting pretty. Reclining chair which is designed to ease strain at five key points helps to relieve tension. Chair modeled is in simulated leather (plastic) that's stain resistant, easy to clean.

World Happenings In Pictures

AIR SICKNESS TEST—In laboratories across Canada, the Defence Research Board conducts tests aimed at keeping servicemen and women fit. This plexi-glass cage surrounds an aircrew candidate on a motion sickness swing, as he undergoes an air sickness test.

END OF LINE—Frank and Clair Tock, of Oil City, Pa., both escaped serious injury when this car crashed into the Trinity Methodist church just below a sign showing hands clasped in prayer.

EASTER TOPPER?—Rarely has the Easter Parade seen such an eye-stopper of a topper as this one worn by Ballerina Tanaquil LeClerc in New York. The bizarre bonnet was fashioned of horse hair and feathers by Madame Karinska for Miss LeClerc to wear in the New York City Ballet's production of "Western Symphony." Tanaquil likes the hat so much she'll wear it in the Easter Parade at Monte Carlo, where the troupe will be dancing. The company leaves for Europe on April 1.

MASTER "CARVER" — Stan (The Man) Musial poses with his favorite "carving" tools at the Cards' spring training camp in St. Petersburg, Fla., where he's polishing up his "woodcarving" technique for the coming season. Six times the batting champ of the National League, he's carved a career average of .344, batted .330 in 1954.

NEW FLAG OVER SUEZ ZONE—Premier Gamal Nasser sees the Egyptian flag raised over Shalufa camp, the first British army base in the Suez canal zone to be turned over to Egypt.

QUEEN'S OWN BOY SCOUTS—Boy Scouts Jerry Berry, 17, left, and brother Gerald, 16, sons of a USAF meteorologist stationed in England, enjoy the unusual distinction of being made Queen's Scouts. They're receiving their badges from Rev. Montague Eyden, scoutmaster, at a ceremony in London. Eagle Scout Jerry is believed to be the first American Boy Scout of his rank to be named a Queen's Scout.

BYRD'S DOG-WATCHDOG — Sen. Harry Flood Byrd, Virginia Democrat who watchdogs the Senate Finance Committee, briefs "Happy," his constant companion, on the world situation. The five-year-old cocker spaniel has been with the senator for two years, never tries to nip an appropriation or even a visitor.

BIG BOY, MAN-SIZED AWARD—William R. McNulty, 15, Pittsburgh, Pa., high school senior, is presented with the 9th annual Junior Citizenship Award by David W. Armstrong, national director of the Boys' Clubs of America, during ceremonies at New York City. Also named "Boy of the Year," William, 6 feet, 3 inches tall and still growing was honored for his leadership, initiative and service to home, school and church.

The Sports Clinic

(An official department of Sports College)
Conducted by Lloyd "Ace" Percival

Controlled passing in hockey

When making long passes, pass at top speed. When making short ones, make them as quickly as possible. However, be sure they are slow enough for the receiver to handle easily. Be especially careful when the receiver is coming toward you. Consult with your team mates and find out how they like their passes to be thrown. Then, keep this in mind all through the game, giving them the puck where they like it. This is important as it will make your passes more effective and help in general to develop a team's morale and spirit.

Dairy foods and athletes

Most athletes, in spite of the fact they need extra protein, fail to eat enough of the foods containing this key element. Dairy foods (milk, ice cream and cheese) should therefore be a daily must as they are excellent protein sources and have other important food values.

Good attitude important

The player who worries about

whether or not he is going to get tired, whether or not he is going to get a stitch or feel sick will have a much lower endurance than the player who goes out in an aggressive, determined and cheerful state of mind, feeling he can keep driving no matter what. This is true even if the athletes have the same basic condition. The "try guy" who refuses to be concerned about his physical fatigue symptoms will always have better endurance and the coach should try to sell his players on this idea.

Tip from a champion

Whenever you are having something to eat that requires sweetening be sure you use honey as the sweetener. Parry O'Brien, world shot put record holder uses it as part of his regular diet and also on the day of competition. So take a tip from Parry O'Brien and put honey on your regular diet.

How to avoid 2,4-D damage

Damage to sensitive crops through the application of systemic herbicides can involve the sprayer in legal action.

This warning is issued by the Manitoba Weeds Commission and a pamphlet on how to avoid 2,4-D damage has been prepared for distribution.

Plants sensitive to 2,4-D and allied chemicals include sunflowers, sugar beets, rapeseed, tomatoes, beans, cauliflower, cabbage, Manitoba Maple and many other ornamental trees and shrubs.

As damage is usually the result of thoughtlessness and carelessness, the pamphlet sets forth the precautions that should be taken to avoid danger.

The publication is available from local Agricultural Representatives.

The elaborate decorations worn by knights in the Middle Ages grew out of the necessity for identifying the men behind their garb.

Patterns

Crocheted hexagon

18 inches diagonally

by Alice Brooks

Lovely decoration for tables, chairs, buffets! Easy-crochet this smart hexagon-shaped design!

Pattern 7141: Crocheted Hexagon, 18-inches diagonally, No. 30 mercerized cotton; smaller in No. 50; larger in bedspread cotton. Seven for 50-inch cloth, No. 30 cotton.

Here's the Answer

WEEKLY BIBLE COMMENT

DAILY LIVING IS THE TEST OF A CHRISTIAN

The man with compassion was the one whom we call "the Good Samaritan," the man whom the parable of Jesus has made famous, and the outstanding type of all who have devoted themselves to human need and the service of their fellow man.

That a Samaritan, despised in his time as belonging to a people of a corrupted religious belief, should become that type in itself a striking thing.

But the Parable is also in every way striking for its contrasts and its plain insistence that religion in its outward form and profession is of little account or significance, if the reality of genuine goodness, humanity and mercy be lacking.

It often happens that some non-church member displays qualities of character and goodness in action that puts to shame many church members and professing Christians. But that is not the general rule.

There is no particular evidence that there were many good Samaritans, and there is plenty of evidence that there were many Jews whose lives were marked with the qualities of that particular Samaritan. It was a Jew, Jesus Himself, who told the Parable.

But the standard of Christian good living is set in such character and conduct as the Good Samaritan displayed. One cannot be a good Christian without being a good neighbor, and there is no such thing as faith in God, and love of God, that is not associated and reflected in love toward one's fellow man.

"If a man love not his brother whom he hath seen, how can he love God whom he hath not seen?"

Kitchen Meditations

By JANE DALE

BITTER WIND

Out of the northeast comes the bitter wind
Putting to naught the sun's brave shining;
Driving before it the last fall of heavy snow
And laying bare the treacherous ice.

On into the night rages the bitter wind
Defying the hearth's glow and endless firing;
Driving off roads and accustomed pathways
All but the hardy and needed ones.

Sometimes in the small hours dies the bitter wind
Leaving the earth ravaged and silent;
Giving way to the south wind's faint stirring
And man's hope of a fairer tomorrow.

Manitoba farmers feel crop insurance rates excessive

Manitoba farmers generally consider that the rates required to put into effect the recommendations of the 1940 Economic Survey are excessive, according to an interim report of the Manitoba Crop Insurance Commission.

The Crop Insurance Commission was appointed in October, 1945, to study certain aspects of crop insurance in Manitoba. Chairman of the three-man committee is W. G. Malaher.

Still under study

Two of the three items on the commission's agenda are still under study: how the 1 percent Prairie Farm Assistance Act levy could be applied if the moneys were used only in Manitoba; and crop insurance plans now operating in the United States and other parts of Canada.

Public hearings held throughout Manitoba, where farm organizations and other interested parties could present views on all questions before the commission, were completed in January. Agreement was general, the commission reports, that under today's farming conditions the Prairie Farm Assistance Act is inadequate and

has outlived its usefulness in Manitoba.

Briefs referring to PFAA included 20 favoring its discard, 14 its retention with amendments and two doubting the advisability of trying to amend it.

While the majority of briefs, 24, favored some kind of crop insurance plan for the province, five were opposed and eight gave qualified support.

Practically all representations expressed the view that it would be necessary to have underwriting by the Government of Canada or Manitoba.

Those favoring collection of premiums through a levy similar to that of PFAA suggested a rate ranging from one to three percent of the value of grain marketed.

Others thinking in terms of a premium based upon percent of coverage suggested that premium rate as high as ten percent of coverage might be acceptable to some farmers.

Spokesmen from districts where hail insurance was widely sold suggested that farmers might pay a premium approximately equal to hail insurance.

Elm Creek hog producers win competition

First prize in the 1954 Get-of-Sire Bacon Competition has been won by a group of hog producers headed by J. A. Halliday, Elm Creek district, Manitoba.

Mr. Halliday and nine other farmers entered a total of 122 hogs marketed between July 1, 1954, and January 31, 1955. The hogs were sired by Stoney Oak Mac 3H, a boar bred by C. J. Edwards of Stonewall and purchased by Mr. Halliday in the fall of 1953.

Second prize went to the Silverfield Club at Gretna, Manitoba, which marketed 64 hogs sired by Nordlight Hansel 2H. This boar was bred by Paul Bergstresser, Sewell.

The Get-of-Sire Bacon Competition, which was first held in 1949, was conducted by the Canada and Manitoba departments of Agriculture. Contest groups are comprised of five or more producers and a Boar Club caretaker or boar owner who market at least 50 hogs sired by one boar.

Of the 933 hogs marketed by 85 producers in the prize-winning groups, 52.2 percent graded A. The 1954 provincial Grade A average (sows and stags excluded) was 25.2 percent.

Of the 1610 hogs marketed by all producers in the 22 groups entered in the competition, 713 graded A and 687 graded B.

The competition indicates, it was pointed out, what a producer can do by paying more attention to the breeding, feeding and marketing of his hogs. It is also a means of discovering blood lines that are most effective in the production of high quality litters.

Helpful Hints

Soot can be removed from a carpet or rug by covering it with dry salt, and working this around until it becomes solid. Then sweep up the salt.

When troubled with dandruff, try rubbing pure olive oil into the scalp for a few nights. Shampoo the hair every two weeks and rinse well in cold water.

If you haven't chuckled out the Christmas cards — don't. They make fine rainy day playthings and provide endless material for cutouts when some child's in bed with the sniffles.

ANSWERS TO QUICK QUIZ

5. Money that the government collects in taxation and then pays out to the public in the form of family allowances, old age pensions, etc. 3. About 180,000. 1. The Halifax Chronicle, first issued March 25, 1752. 4. Mount Logan, in the Yukon. 2. As Auditor General he audits federal government expenditures and revenues and reports to the House of Commons on government spending.

The Andes is the longest mountain range in the world.

Funny and Otherwise

"So he's teaching you to swim?" Joan asked her friend. "What have you learned so far?"

"That he's 21, single, and has a good job!"

"My wife told me to take our cat away out into the country and lose it. I put it into a basket and walked out into the country about eight miles."

"Did you lose the cat?" "Lose it! If I hadn't followed it, I'd never have gotten home."

After the family had increased to three it was decided to employ a nursemaid.

"My husband is very particular whom we engage," said the mistress to a girl who applied for the job. "Are you faithful? Have you a kind and loving disposition? Will you—"

"Excuse me, madam," said the girl, "but am I to take care of the baby or your husband?"

They stood in front of the jeweller's shop. Said she, coaxingly: "Darling, look at that lovely diamond ring."

"Yes, dear," he replied, "if ever I have to refuse you a diamond ring it will be one like that."

The lady of the house had hired a private detective to spy on her husband. Soon he approached to make his report.

"Your husband is playing with the maid," he announced.

"Just as I suspected," exclaimed the jealous wife. "Now, I want you to watch every move he makes."

"Aw, have a heart lady," pleaded the snoop. "I've watched them play 11 checker games already."

A man who was driving along a country road offered a stranger a lift. The stranger accepted. Shortly afterwards the motorist noticed that his watch was missing.

Whipping out a revolver which he happened to be carrying, he dug it into the other man's ribs and exclaimed: "Hand over that watch."

The stranger meekly complied before allowing himself to be booted out of the car. When the motorist returned home he was greeted by his wife.

"How did you get on without your watch?" she asked. "I suppose you know that you left it on your dressing table?"

WIDE MEMBERSHIP

REGINA.—Sir Otto Lund, commissioner-in-chief of the St. John Ambulance Brigade, said here there are more than 203,000 uniformed personnel in the association throughout the British Commonwealth. He is on a tour of inspection of Canadian brigades.

A single fatality occurs per one billion passengers carried on British railways.

1,000 British Boy Scouts by airlift

Some 1,000 British Boy Scouts will be carried to next summer's "Jamboree of New Horizons" at Niagara-on-the-Lake, Ont., by a giant airlift.

The jamboree runs Aug. 18-28. The boys, representing nearly every county in Britain, will fly to Toronto in chartered aircraft from London, Manchester and Prestwick, Scotland. The operation expected to take about 10 days, starts Aug. 5. They will be led by Lt.-Col. M. S. Adsheed.

"It will be the farthest any British contingent has had to travel to a world jamboree," scout headquarters in London announced. "More than 10,000 scouts from all over the world are expected to attend."

World scout jamborees are held every four years, and this, the eighth, is the first to be held outside Europe.

NEIGHBORS

I think when God made neighbors, He was glad because He knew The joy there is in sitting down To chat with friends — don't you?

Skies somehow never loom as grey, Our joys are deeper—shared. 'Twas easier far to bear a pain When someone said she cared.

To do a patching or mending Or to sew a waiting hem— Even just to dream away an hour With a neighbor now and then, Makes us glow with love of living Right within our acre here.

For to know we all are neighbors Brings a bit of heaven near. —A. Smyth

The sour-wood or sorrel tree is an American tree of the health family.

::: APPETIZING RECIPES :::

Crushed pineapple, rich cream cheese filling and a crumb crust combine to make this gale Pineapple Cheese Cake.

PINEAPPLE CHEESE CAKE

1½ cups zwieback crumbs	¼ teaspoon salt
1/3 cup sugar	2 packages cream cheese (6oz.)
3 tablespoons melted butter	½ teaspoon vanilla extract
1 cup well drained crushed pineapple	3 egg yolks
2 tablespoons flour	2/3 cup light cream
1/3 cup sugar	3 egg whites
	½ cup whipping cream
	Mix together zwieback crumbs, 1/3 cup sugar, and melted butter.

Honors for seven including Governor-General, publisher

SASKATOON—The names of seven Canadians to receive honorary doctor of laws degrees at the University of Saskatchewan's 44th Annual Convocation in Saskatoon on May 13th were announced recently.

Dr. W. P. Thompson, university president, said the selection is "in keeping with the celebration of Saskatchewan's Golden Jubilee Year, and those who will be honored have made important contributions to the development and welfare of the province."

Honorary doctor of laws degrees will be conferred on:

The Right Honorable Vincent Massey, of Ottawa, governor-general of Canada, who will present the convocation address.

The Honorable W. J. Patterson, of Regina, lieutenant-governor and former premier of Saskatchewan.

Charles D. Fisher, of Lipton, who was a veteran of the South African war and homesteaded in the province. He has been very active in community affairs and has served in important offices—reeve of his municipality, president of the Rural Municipalities association, member of the Municipal Advisory Commission and of the Cancer Commission.

L. H. Hantleman, of Plato, came to Saskatchewan in the year the province was formed (1905), and has been very active in the

affairs of his community. He is an excellent farmer, a former member of the legislature and of the board of governors of the university, and was the first chairman of the board of the University hospital.

J. R. MacKay, of Saskatoon, was for many years principal of Bedford Road Collegiate Institute, took an active part in the organization of the Saskatchewan Teachers' Federation and was its first president. Has also been president of the Canadian Teachers' Federation.

Judge Alexander Ross of the district court of Yorkton. He was admitted to the Bar in 1901, went overseas in the First World War and was promoted to brigadier; has been past president of both the Saskatchewan and Dominion Commands of the Canadian Legion.

S. N. Wynn, publisher of the Yorkton Enterprise for 50 years, earliest past president of the Canadian Weekly Newspaper association (now vice-president), president of the Saskatchewan Hospital association.

Admission to convocation, held in the university gymnasium at 10 a.m., Friday, May 13, is by ticket only. Tickets may be secured from the business office at the university.

Quick Canadian Quiz

- Where, and when, was Canada's first newspaper published?
- Watson Sellar does what job for Canadians?
- How many persons are employed in the federal civil service?
- Name Canada's highest mountain.
- What are "government transfer payments?"

(Answers in another column)

SMUGGLING PRESIDENT

Thomas Jefferson, third president of the United States, smuggled the first rice seed from Italy to South Carolina and thus initiated the south's rice-growing industry.

On The Side : By E. V. Durling

Pertinent question

People who order fried eggs turned over don't deserve to have eggs. Neither do those who order their eggs boiled only two minutes. Fried eggs should be sunny side up. When boiled, the period of boiling should be four minutes. Incidentally, a man who insists his eggs be unusually soft generally makes a difficult husband. Is fussy about other things and drives his loving wife ragged with his demands. Have your daughter keep this in mind. Before she accepts a man who proposes marriage, tell her to be certain to ask him, "How do you like your eggs boiled?"

"Hair-raising" fact

When husband and wife are red-haired their children are usually red-haired. When one of a couple is red-haired, they generally have at least one red-haired child. However, did you ever hear of a husband and wife both having jet-black hair whose children are all red-haired? It has happened. A British couple, John and Pauline Earle, both dark-haired have five red-haired children. A set of twins and a set of triplets. Three boys, two girls.

Almost confidential

The first U.S. president, George Washington, brewed his own beer. A recipe for this beer in Washington's own handwriting can be seen at the New York public library. . . . Some recent happenings bring strongly to mind the immortal words of James Freeman Clarke: "A politician thinks of the next election; a statesman, of the next generation."

Cut-rate insurance

Should those who do not drink alcoholic liquors get a lower automobile accident rate than drinkers? In some sections they do. I have heard of members of a temperance organization being offered a 15 percent rebate on automobile accident policies by one company.

Golf games excepted

Have you a friend or relative who is an automobile salesman? Or a life insurance salesman? Or one engaged in any kind of selling that necessitates making calls at homes or offices? How many calls a day does he average? Every man engaged in the type of selling referred to should make at least eight calls a day. Such is the advice of one of the world's greatest salesmen.

Complaint Department

Many women are still unhappy as to the brief wearing life of the nylons they buy. Lamenting on this situation, one woman comments, "When nylons were first manufactured they were usually guaranteed for six months. Where can you find, at this time, a manufacturer with such confidence in his product?"

He should know

What do women talk about most? That is a much discussed query. A fellow who is the only man in an office in which over 100 women are employed should be qualified to answer the aforementioned query. He says the favorite subject of conversation among women is their health. That the worse they think their health is the more they enjoy talking about it.

Accent on youth

An unusual feature of the matrimonial career of Charles Chaplin is that all his wives were teenagers when he married them. Paulette Goddard, the third Mrs. Chaplin, was the oldest of the four brides. She was 19. Mildred Harris and Lita Grey were each 16. Oona O'Neill was 18.

OUR COMPLETE SHORT STORY—

"A good cigar is a smoke"

By T. W. TOBIN

CLANCY McBride stood on the corner of Fifth and Elbow, chewing on his cigar and muttering to himself. Clancy was unhappy, as he rocked back and forth on his number twelve he looked his watch. "Late again," he growled to himself. "That girl has never been on time in her life. Here it is seven o'clock, and she was supposed to meet me at six. I'm getting tired of it. This time it's gonna be different."

There were two things Clancy loved, Maggie O'Toole and a good cigar. Maggie was the most beautiful girl in the world. Her Irish blue eyes and coal black hair made Clancy's heart tingle when he thought of her, which was most of the time. She had a wit about her too and when she answered Clancy she would tilt that little turned-up nose in the air and put him back in his corner with her answers. As to the cigars, Clancy smoked as many in a day as there was time.

"I'll teach her this time that I'm not a guy to be trifled with," said Clancy, also to himself. "This time I'm gonna be late, and let her wait for me."

Clancy threw his chewed-up cigar away and reached in his pocket for another. There was only one left and that was a phony brand that one of the boys down at the plant had given him. Clancy decided not to smoke it. There was a cigar store across the corner and he decided to go over and buy some more.

As Clancy entered the cigar store, he made a striking figure. In his blue pin stripe suit and derby hat he cut quite a figure. And as if that wasn't enough, his shoulders, which would have done credit to a wrestler, barely cleared the doorway. Clancy wasn't a big man but when he went in a door, nobody went out the same door at the same time.

"I'll take a few cigars," said Clancy to the man behind the case.

As Clancy said this two other men walked in and said in a quiet voice, "This place is pinched for gambling."

"But listen, Bub, I got a date," said Clancy.

"You'll have a date all right, in the morning with the judge," said one of the plainclothesmen.

Clancy thought fast. He had to meet Maggie very soon and he didn't want to go to jail. What could he do? Then he thought of the cigar, the last one he had. He pulled it out of his pocket and handed it to the cop who had just spoken and who seemed to be in charge.

"Have a cigar, Doc," said Clancy. "As long as I'm going to jail I won't need it. I came in here to buy some more, but I guess you guys won't believe me."

"Thanks, Bud," said the policeman. "I'll just take that. And as long as you're such a square guy I'll let you go. But stay out of these places, they won't do you any good."

The cop took the cigar, bit the end off it and touched a match to it while he blew clouds of blue smoke into the air. "Good cigar," he said.

But Clancy didn't hear him for he was already out the door and starting across the street, thinking of the two things he loved the most—Maggie O'Toole and another cigar.

Clancy was half way across the street when he heard the explosion. It never occurred to him that he was involved, but the noise made him turn his head and look back. Just as he looked back he saw the plainclothes cop come out of the cigar store and he was plenty mad. Moreover, he had a stump of a cigar in his mouth and his face was blackened as if from an explosion.

One look was enough for Clancy, he knew the effects of a

loaded cigar when he saw one, and this one didn't look so good, in fact it was tragic, for Clancy—it meant jail for sure.

Clancy picked up his number twelve and started to make some time. Luck was with him for the light changed just then and the policeman was stranded on the curb across the street. But Clancy didn't wait, he was in full stride when he saw a familiar figure ahead. It was Maggie O'Toole, and she looked like she was ruffled about something.

"Hey, you big lug, it's about time you showed up. What's the idea of keeping me waiting?" said Maggie O'Toole, grabbing Clancy as he came by.

"I ain't got time to explain now, Maggie," he puffed. "The cops are after me and I gotta get out of here, or I'll go to jail sure."

"Now shut up and listen to me, Clancy," said the most beautiful girl in the world. "You stay right here and I'll handle these cops."

"But you don't understand, Maggie," wheezed Clancy. "I gave that cop a loaded cigar and he's mad. He'll run me in sure. I gotta get out of here."

"Let me handle this," said the girl. "I was late for a reason today, and I'll fix everything."

Clancy could feel the strong arm of the law reaching out for him. He could just see the cold steel bars surrounding him. It was too late to run now. The light changed and already the plainclothes policeman was on his way across the street. Clancy glanced back and saw that the expression on the policeman's face hadn't become any more friendly, in fact he was getting madder with each step.

Clancy resigned himself to his fate. If he was going to be arrested well it would just have to be. He looked down into the bluest eyes, the cutest up-tilted nose standing there so unafraid in that smart little business suit she wore.

"I still love you, Maggie, and always will," he breathed. "Promise me you'll come and visit me in jail."

"Quiet, you big lug, you're not going to jail. That's what I've been trying to tell you if you'd just hold still. That's why I'm late."

"All right, Bud, tried to pull a fast one on me, huh?" said the

puffing and red-faced policeman as he finally got to the curb where Clancy and Maggie stood.

"It was a mistake, officer, I didn't know it was loaded, offered Clancy.

"That isn't good enough," growled the copper stepping in between Clancy and Maggie. "Put out your paws, Bud, I got some jewelry for 'em."

"Just a minute, officer, this man is in my custody," said a small Irish voice in the officer's ear.

"What do you means he's in your custody? He's in mine," said the copper.

"That's what you think. Take a look at this," said Maggie, and she produced a gold-plated badge.

"Excuse me, Miss, I didn't know you was on the force. You can have him, you caught him," said the copper.

"Yes, I caught him and I'm going to keep him," said Maggie as she started down the street.

"What's the deal, Maggie?" queried Clancy now that he had his breath back.

"I told you I was late for a reason, didn't I? Well, the reason was I just got sworn in as policewoman. And you're my first arrest. What do you think of that?"

"I think it's swell, Maggie," said Clancy looking at the most beautiful policewoman in the world. "But there's only one thing that bothers me."

"What's that?"

"I need a cigar," said Clancy.

Drive With Care!

Love life of whooping crane baffles wildlife service

OTTAWA.—The Canadian wildlife service is baffled over the love life of the rare whooping crane.

Their evasiveness and small numbers—there are only 21 known to be in existence—make it hard for wildlife experts to track them down to their summer nesting grounds.

Wildlife people know the big cranes spend the winter in Texas and the summer somewhere in Canada's Northwest Territories. That's about all.

They don't know why the bird is becoming so rare—why it isn't reproducing—because they can't get near its nesting grounds.

Numerous century ago

About 100 or 150 years ago, the whooping crane was a common sight in Canada and the United States. Hunters probably accounted for most of the decline in the population, but since the early 1900s the whoopers have been protected by the migratory bird regulations. Hunters may have shot a few by mistake since then, but officials feel there should be more than 21 survivors.

The population was cut to 21 last winter. Three of the big red-crowned cranes failed to return to the wintering grounds at Aransas national wildlife refuge in Texas. No one knows what happened to the missing birds, although hunters are suspected.

The Aransas refuge, 47,000-acre sanctuary, is the only known home of the birds. There they are watched from platforms atop 20-foot poles. But only one of the summer mating grounds is known.

About a year ago whoopers were located nesting near Wood Buffalo park in the Northwest Territories. The site will be investigated further this spring.

Other traces have been found in the Territories. However, one wildlife spokesman said the most likely spots are bug-infested swamp lands "just about impossible to investigate."

"Sometimes we hear of a place where they have been seen," he added. "But when our crews get there to investigate the birds have gone."

Spring expedition

He said regular department teams in the Territories have been alerted to watch for the birds and an expedition is being planned for this spring.

The spokesman said that if a nesting ground is found it likely will be turned into a sanctuary.

Officials feel that little will be known about the bird until its mating grounds are found and investigations are carried out to see what is preventing the population from increasing.

Originally the big bird with the six-foot, black-tipped wings travelled from the Arctic coast to central Mexico and from Utah to South Carolina. The flight pattern in recent years goes across Texas, central Oklahoma, Kansas, Nebraska, South Dakota, North Dakota and northwesterly across Saskatchewan into the Territories. There the trail disappears.

Made with Amazing New Active DRY Yeast!

JELLY BUNS

Measure into small bowl, 1 c. lukewarm water, 2 tps. granulated sugar; stir until sugar is dissolved. Sprinkle with 2 envelopes Fleischmann's Active Dry Yeast. Let stand 10 min., THEN stir well. Cream 3/4 c. shortening; gradually blend in 1 c. granulated sugar, 2 tps. salt, 1 tsp. grated nutmeg. Gradually beat in 2 well-beaten eggs. Stir in 1/2 tsp. lemon extract, 1/2 c. milk which has been scalded and cooled to lukewarm, and yeast mixture. Stir in 3 c. once-sifted bread flour; beat until smooth. Work in 3 c. more once-sifted bread flour. Knead until smooth and elastic; place in greased bowl and brush top with melted butter or shortening. Cover and set in warm place, free from draught. Let rise until doubled in bulk. Punch down dough and cut into 36 equal portions; knead into smooth balls. Brush with melted butter or margarine, roll in fine granulated sugar and arrange 1/2" apart on greased baking pans. Cover and let rise until doubled in bulk. Twist the handle of a knife in the top of each roll to form an indentation; fill with jelly. Cover and let rise 15 min. longer. Bake in moderately hot oven, 375°, about 18 min.

• No more disappointments because the yeast has spoiled! Fleischmann's Active DRY Yeast replaces old-fashioned perishable yeast because it keeps fresh and full strength — right in your cupboard! For fast-rising dough and grand oven results get Fleischmann's Active DRY Yeast to-day!

CONTROL OF WIREWORMS & MAGGOTS IN GARDENS

Many enquiries have been received lately on how to control these insects in the gardens. In many gardens it is impossible to grow onions or radish because of these two insects.

The soil may be treated by dusting or spraying the soil after cultivation but before planting, with Aldrin, at a rate of 5 lbs. per 1000 square feet or 200 lbs. per acre. Immediately work the insecticide thoroughly into the soil to a depth of four to five inches. REMEMBER—Aldrin is a poison and must be used with caution.

SMUT TREATMENT

There is a discount of 15 cents a bushel on smutty wheat. This is a loss of around \$300.00 on every carload that grades smutty. Much of this loss can be avoided by the proper treatment of seed grain. Use one of the recommended mercurial compounds as these substances increase the germination and strength of the seed to resist soil borne diseases.

HAVE YOU A DEEP FREEZE OR FOOD LOCKER?

If you have a deep-freeze or food locker why not plan now to come to the Drumheller Calf Show and Sale on May 28th and

purchase a prime animal. Your local food locker manager will butcher and process the meat for a reasonable fee and you will be assured of a choice supply of meat for the coming year. The local support of the 4-H Clubs will be appreciated.

IN MEMORIAM

In memory of our very dear friend and pal Bessie Cooper who passed away April 27th, 1952. "Days and years pass swiftly by, But memories never die."

Sadly missed by Dorothy and Harry Hunt and Howard.

HOUSECLEANING TIPS:

Of all the chores that busy women hate most, it's the housecleaning session that creates a general upheaval. Julia Kiene has said this: "If the vacuum cleaner is used as it should be used to clean above the floor as well as on the floor, Spring and Fall housecleaning would be a thing of the past". Well, that's exactly where it belongs—so let's not say that the housecleaning tips I'm going to give you now are for seasonal use, but some ideas that could fit into your routine at any time.

To clean grease or crayon marks off wallpaper—first scrape lightly with a dull knife to remove any solid matter. Then apply a paste of corn starch and carbon tetrachloride. When the paste dries, brush it off. Repeat as often as necessary.

When shining metal light switch panels, make a shield of cardboard to fit around the panel.

This will protect the wall from stains. Waxing the metal retards discoloration.

When you clean windows, use up and down strokes on the outer surface and side to side strokes in the house. If any streaks are left when you are finished, you will know which side needs a little more cleaning. Use the crevice tool of your vacuum cleaner to get the dirt out of the window grooves. Waxing exposed sash cords will save wear and tear and make windows ride up and down easier. And wax the window sills, of course, for extra protection from blown in moisture and dirt.

Before you put up screens—take them into the open air and blow the dust from them with the vacuum cleaner hose. Then rub a little paste wax on the edges and they won't stick when you put them in or take them down. This waxing idea is also good for storm windows, doors, desk and dresser drawers, and so on.

To clean the inner recesses of radiators, put a damp cloth behind and below the radiator sections and blow the dirt and dust hidden ledges onto the damp cloth.

When you're putting clothes away for the next season, vacuum the inside of trouser cuffs of men's suits, also the plackets and folded trim on your wool suits and dresses. Wax the rods of your closet while the clothes are out—hangers will move more easily. And wax transverse rods too—draw drapes will be easier to pull back and forth and much less likely to stick.

Furniture will be easier to move and will cause less marking on the floor if you wax the bottoms of table and chair legs. Lamp bases and knick-knacks of wood, metal, porcelain and so on

can be waxed—they'll stay clean longer. Ashes won't stick to waxed ash trays—dust and dirt won't collect on the bottom and sides of a waxed waste basket—and your waxed telephone and sewing machine won't show fingermarks. Painted or oilcloth covered shelves in cupboards can be cleaned

and waxed at the same time with that kitchen wax—and no more nuisance with dishes sticking. Wax clothes lines and doors also.

Please bring in reports of your meetings and sports events. That is what your paper is for.

FARMERS!

YOUR MODERN TRACTOR AND COMBINE NEED
A NEW LEADED GAS WITH HIGHER OCTANE RATING

NEW PURITY 99

"LEADED"

TRACTOR FUEL

NOW AVAILABLE!

CHECK THESE ADVANTAGES

- Increased operating efficiency.
- Lower operating costs.
- Quicker starting and warm-ups.
- Low deposit-forming tendencies.

Anglo American Exploration Co. Ltd. have produced a NEW leaded gas, SUPERIOR GAS, to satisfy the particular requirements of the modern Tractors and Combines used on Western Canada's farms today. Here's power, performance and economy to help you farm more profitably.

SCIENCE IN YOUR LIFE

Premature Babies

One of medicine's most difficult problems is premature birth. Infants who arrive early are not actually ready to begin life in our world. They are too small, and their nervous systems are still undeveloped. Infectious diseases find them easy prey. Their feeding is difficult.

In spite of all this, doctors now have new tools with which to fight for a baby's life when standard treatment fails.

When a child arrives prematurely, the doctor usually puts it into an incubator, a sealed crib with special heaters, a supply of pure oxygen and filters designed to keep out dangerous germs.

Protecting the infant from infection is the big problem. In spite of air filters, germs can still attack the child. And recent investigations show that the best way to combat the infectious invaders is with the antibiotic drugs that are effective against many different germs.

Malnutrition of the mother is being studied as a possible cause of premature birth. Preliminary studies indicate that there is danger of premature birth unless the expectant mother is getting enough vitamin E, the so-called fertility vitamin in wheat germ oil, and vitamin K, which promotes healthy blood circulation.

The laboratories have developed nutritional supplements like Obren to provide in capsule form the vitamins and minerals needed by a pregnant woman.

Much more will have to be learned by science before premature births can be prevented. However, their number is gradually decreasing. And when a baby does arrive before its time, today's chances of survival are much greater than they were even five years ago.

All under one roof

A branch of a chartered bank is much more than the best place to keep your savings. It is an all-round banking service-centre that provides services useful to everyone in the community.

In every one of 4,000 branches in Canada, people are using all sorts of banking services. They make deposits, cash cheques, arrange loans, rent safety deposit boxes, transfer money, buy and sell foreign exchange.

Only in a branch of a chartered bank are all these and many other convenient banking services provided under one roof. A visit to the bank is the way to handle all your banking needs—simply, safely, easily.

THE CHARTERED BANKS SERVING YOUR COMMUNITY

SEE THE BANK ABOUT IT
